

Fortune Telling Services Platform — Product Blueprint

1) Product Vision

Build a premium **fortune telling and spiritual guidance platform** with a soft, minimal aesthetic focused on trust, conversion, and seamless booking.

The platform supports: - Tarot readings - Astrology / birth chart consultations - Numerology sessions - Love & compatibility readings - Career and finance guidance - Spiritual healing sessions - Webinar / workshop registrations (future-ready)

2) Core Website Pages

Based on your uploaded structure, the site should include:

Homepage

Purpose: convert visitors into booked sessions.

Sections: 1. Hero section - Clear headline - Trusted spiritual advisor positioning - CTA: **Book Your Reading** 2. Featured services cards 3. How it works (3-step flow) 4. Testimonials 5. In-person Delhi + online worldwide 6. Webinar highlights (future) 7. FAQ 8. Footer with contact + socials

About Me

- Personal story
- Methodology
- Experience / certifications
- Philosophy and trust-building copy

Services

Each service card should include: - Service name - Duration - Price - Delivery mode (online / in-person) - CTA: Book now

Booking

Integrated flow: 1. Select service 2. Pick date/time from Google Calendar synced availability 3. Fill intake form 4. Pay via Razorpay 5. Auto-confirmation email + calendar invite

Contact

- Contact form
- Request callback
- WhatsApp CTA
- Email
- Delhi in-person consultation location

Webinars (Future)

- Upcoming events
 - Webinar waitlist
 - Paid workshop registrations
 - Replay access
-

3) Required Functional Modules

A) Booking Engine

Must support: - Google Calendar sync - Live availability slots - Auto calendar blocking after payment - Reschedule rules - Cancellation workflow - Time-zone support for worldwide users

B) Intake Forms

Dynamic pre-session questionnaire: - Name - DOB - Birth time - Birth place - Area of concern - Preferred reading type - Questions to focus on

C) Payment System

Use **Razorpay**: - UPI - Cards - Net banking - Wallets - International cards (for global clients)

Payment logic: - Full payment before confirmation - Failed payment retry flow - Refund rules for cancellations

D) Automated Email + WhatsApp Notifications

Triggers: - Booking confirmed - 24 hour reminder - 1 hour reminder - Reschedule notice - Cancellation notice - Webinar reminder

E) Analytics Dashboard

Admin metrics: - Leads generated - Page visits - Conversion rate - Revenue by service - Repeat customers - Most booked time slots - Webinar signups

4) Admin Panel

Essential admin features: - Manage services and pricing - Block manual unavailable dates - See all appointments - Client history - Payment logs - CRM notes - Export lead data - Webinar attendee management

5) Design Language

Following your uploaded design direction: - Soft minimalism - Muted palette - Warm celestial gradients - Light typography - Calm whitespace-heavy sections - Rounded cards - Subtle glow accents - Nothing visually aggressive

Recommended palette: - Moon white - Lavender mist - Dusty rose - Deep indigo - Gold accent for premium CTAs

6) Recommended Tech Stack

Frontend

- Next.js
- Tailwind CSS
- Framer Motion

Backend

- Node.js / Next API routes
- PostgreSQL
- Prisma ORM

Integrations

- Google Calendar API
- Razorpay
- Resend / SendGrid email
- WhatsApp Business API
- Google Analytics / Plausible

Hosting

- Vercel frontend
 - Supabase / Neon database
-

7) Monetization Extensions

Future scalable revenue streams: - Subscription-based monthly horoscope - AI daily fortune insights - Premium birth chart PDF reports - Couple compatibility reports - Webinar memberships - Spiritual products marketplace

8) Suggested MVP Build Order

Phase 1: - Homepage - Services - Booking - Razorpay - Google Calendar sync - Email reminders

Phase 2: - CRM + analytics - Webinar system - WhatsApp automation - Subscription products

Phase 3: - AI-powered astrology insights - Mobile app - Multi-reader marketplace

9) Conversion Strategy

To maximize bookings: - Sticky Book Now CTA - Trust badges - Session outcome highlights - Scarcity messaging (limited slots) - Repeat client packages - Festival-specific offers - Delhi local + worldwide dual trust signals

10) Next Build Step

The best next step is to convert this blueprint into a **live landing page + booking website in React/Next.js** with Razorpay and Google Calendar integration.
